

JULY 2020

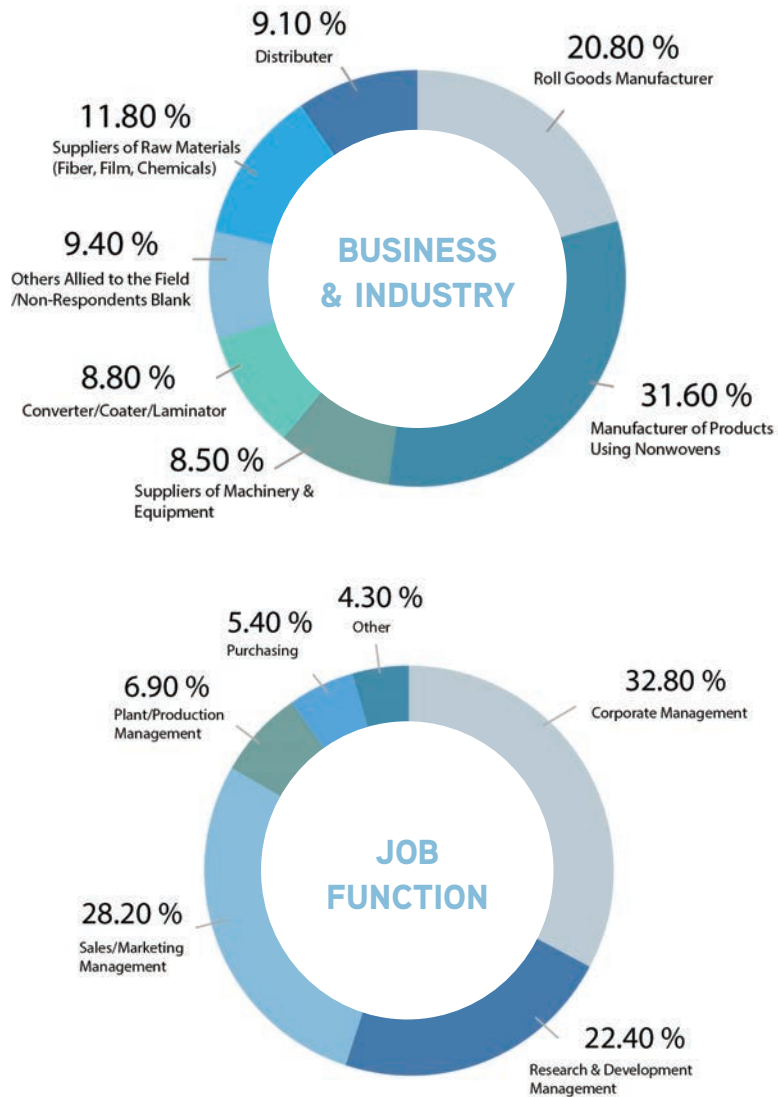

NONWOVENS INDUSTRY SINCE 1970

2020 | INTERNATIONAL BUYERS' GUIDE

Instant Point-of-Purchase Impact. ANYWHERE. ANYTIME. ALL YEAR LONG.

MAGAZINE REACH

Qualified global magazine circulation 10,021, targeted mainly at management level subscribers. Actual magazine readership receives substantial pass-along to multiple readers.

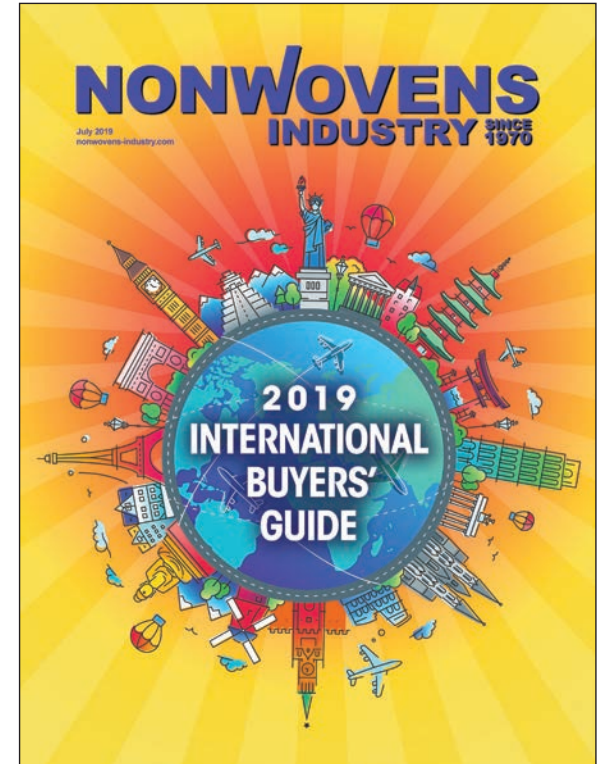

(+) June 2019 Verified Audit Report

EXTEND YOUR BUSINESS REACH AND BE FOUND BY CUSTOMERS AND PROSPECTS

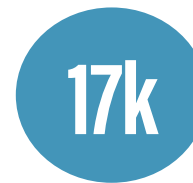

Nonwovens-Industry.com has had OVER 323,700 VISITS in the past 12 months!

Today's Covid19 business environment is both challenging and opportune. With intense demand in some places, rapid slow-downs in others, positioning your brand for success is a challenge, but **Nonwovens Industry's Annual International Buyers Guide** provides a solution.

In the past year, over 323,700 visits were made to **Nonwovens-Industry.com** producing 214,750 Buyers Guide page impressions. Powerful, intuitive search tools brought them all quickly to hundreds of suppliers across dozens of highly targeted product and service categories, providing high-value point-of-purchase impact for listed companies. In the first 4 months of 2020, under pandemic pressure, total Nonwovens Industry Buyers Guide activity has nearly doubled over the last 8 months of 2019.

MAKE YOUR PRESENCE AS IMPACTFUL AS POSSIBLE

Enhanced Company Listings in the **NONWOVENS International Buyers Guide** generate substantially more views and clicks than free basic listings – sometimes as much as 100 times more! When you think about the cost of the investment, consider the possible annual return. You'll be generating leads for your company on a daily basis.

Being prominently visible to your label industry customers at their moment of decision is of paramount importance. And, it's just about the easiest value-add you can possibly provide to your company and customers.

Company Description

Technical Polymer Applications
Calcium Carbonate and dolomite produced by Omya significantly enhance processes and act as mineral modifiers in numerous polymers and engineered material applications. For our customers, we are continuously seeking for value adding solutions to reduce formulation costs and energy consumption and in addition, lower the carbon footprint of the end product.

Going beyond products into processes, Omya combines advanced mineral technology and expertise of more than 130 years with exclusive technical and commercial distribution partnerships. Performance polymers and additives from leading producers complement Omya's comprehensive portfolio of Calcium Carbonates and dolomites, to offer our customers unrivalled market advantage.
